

IOS:

Connect to a WebDAV server

1. In the Finder  on your Mac, choose Go > Connect to Server.
2. Enter the address of the server in the Server Address field.
`https:webdav-mitarget.medfdm.uni-kiel.de`
3. Click Connect.
4. Enter Credentials

You can mount the YODA via the `webdav-mitarget.medfdm.uni-kiel.de` address from the Terminal using the mount command.
