

The yoda portal

Address: <https://yoda-mitarget.medfdm.uni-kiel.de/>

Ask a group manager to activate your account (RZ CAU Kiel E-mail).

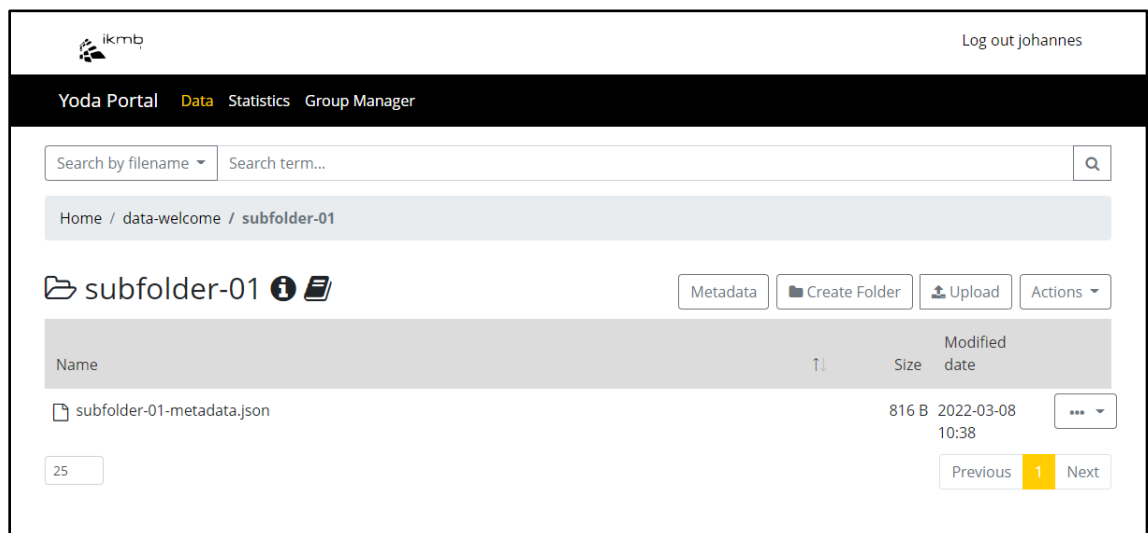

Then you can log in with your RZ CAU Kiel E-mail credentials.

[What is Yoda? - Yoda - a research data management service - Utrecht University \(uu.nl\)](#)

The data module

Here you can work on your data

- Create a folder
- Upload files
- Delete files
- Add meta data to folder

The Group Manager module:

The screenshot displays the Yoda Portal Group Manager interface. At the top, there is a navigation bar with 'Yoda Portal', 'Data', 'Statistics', and 'Group Manager'. The 'Group Manager' section is active. The main content area is divided into two columns. The left column, titled 'Yoda groups', shows a tree view of groups. The 'mitarget-inf' group is expanded, showing subgroups like 'data-general-inf' (highlighted in yellow) and 'datamanager-mitarget-inf'. At the bottom of this sidebar, there are two buttons: 'Remove group' and 'Add group', both highlighted with red boxes. The right column, titled 'Group properties', shows the configuration for the selected group. It includes fields for 'Category' (mitarget-inf), 'Subcategory' (mitarget-inf), 'Group name' (data-general-inf), 'Data classification' (Unspecified), and 'Group description'. An 'Update' button is at the bottom. Below this, the 'Group members' section lists users: e.wacker@ikmb.uni-kiel.de, f.uellendahl-werth@ikmb.uni-kiel.de, wilkat@medinfo.uni-kiel.de, d.ellinghaus@ikmb.uni-kiel.de, johannes (you), and j.labrenz@ikmb.uni-kiel.de. A red box highlights the link 'Click here to add a new user to this group' and the 'Remove user' button. At the bottom of the interface, there is a small text 'Yoda version 1.0'.

Here you can - depending on your own user rights - :

- Create new groups (Top level folder) in your Category
- Add or remove user to/from a group
- Manage user rights for each group
